PROFESSIONAL SUMMARY

Motivated Software Developer with 1 year and 10 months of professional experience in application development and validation systems. Skilled in building data validation and document generation applications using Django and Python, with experience in PHP-based ERP backend development. Strong in writing optimized code, debugging, and database management. Familiar with GitHub Actions and possess foundational knowledge of AWS cloud computing, with a strong eagerness to learn and grow in cloud-based technologies.

TECHNICAL SKILLS

- Backend: Python, PHP, Node.js (basic knowledge)
- Web Technologies: HTML, CSS, JavaScript, jQuery, React, Django
- Databases: MySQL, SQLite
- Version Control: Git, GitHub
- Python Libraries: NumPy, Pandas, Scikit-learn, Matplotlib
- Frameworks & Tools: Django, GitHub Actions, basic knowledge of NestJS
- Cloud & DevOps: AWS (Basic – EC2, S3, IAM – foundational knowledge)
- Other Skills: Data Structures and Algorithms (DSA), Regular Expressions (Regex)

PROJECT SUMMARY

- FashionFrenzy- E-commerce Platform : Created an online fashion store categorized into Women's, Men's, and Kids' wear. Implemented features like product listings, filters, user authentication, and payment logic using Django's built-in functionalities.
- ERP Validation : Built a validation system for critical ERP entries like sales orders and invoices. Enhanced accuracy by integrating
- real- time backend checks and user-friendly input forms.
- Web-Scraped Translation Tool : Automated content extraction and translation from foreign websites using web scraping and basic ML techniques.
- Invoice Commission & Cheque Bounce Handler : Engineered backend logic to compute sales commissions and manage bounced cheque events. Improved financial reporting and system alerts through backend automation.
- ERP Application Core Modules : Contributed to key ERP modules like HR, Inventory, Purchase, Production, SetUp . Enhanced backend logic and reduced query times for data-heavy operations.
- Smart Campus : Smart Campus is a Django-based app where students can apply, pay fees, reserve library books, and view lecture details online. It also sends exam marks to parents via SMS for easy academic tracking.

EDUCATION

- Bachelor of Computer Applications (BCA) – Dr. B.B. Hegde First Grade College, Kundapura (2020–2023) | Aggregate: 91%
- Pre-University Course (PCMC) – Viveka PU College, Kota (2018–2020) | Aggregate: 90.33%
- SSLC – Government High School, Thekkatte (2017–2018) | Aggregate: 80.32%

CERTIFICATES

- Artificial Intelligence with Python – Keonics, Kundapura
- Python for Beginners – Simplilearn
- Introduction to Cloud Computing – Coursera
- Introduction to Front-End Development – Coursera
